10-Year Revenue and Net Profit

ROE Trend

Capital Allocation: Self-Funded Reinvestor

Pros

- Strong free cash flow generation over 5 years signals healthy business fundamentals.
- Profits growing faster than revenue demonstrate improving operating leverage and scale benefits.
- Earnings per share growing above 15% CAGR indicates strong earnings quality and compounding.

Cons

- Five-year revenue growth of approximately 10.7% remains an area to monitor relative to higher-growth companies.
